

PIONEERING CHIROPRACTIC IN ASIA

India

Vietnam

Philippines

Middle East

PRACTICE CHIROPRACTIC IN ASIA

- Be a Pioneer Chiropractor
- Return to a value-based practice
- Not for the lighthearted

Chiropractic is 120 years old but in Asia it is only recently being developed. Can you commit to help advance the profession by accepting to practice in a clinic, in one of our Asian countries? Select from India, Vietnam, the Philippines or UAE.

WORLD OF CHIROPRACTORS

Established	Advancing	Pioneer
Sophisticated Association	Association	Basic only Association
Schools	Rarely Schools	No Schools
1 DC : 5,000	1 DC : 50K -100K	1 DC : 500K+

- 100,000+ some globally
- Near saturation in established nations
- Drastic contrast with less advanced countries
- New opportunities to join the growing # of pioneers in Chiropractic.
- Corporate chiropractic can lead the way into many untouched countries in Asia.

BE A PIONEER CHIROPRACTOR

Why join us?

- In Australia, Canada and the United States the profession has grown on the backs of its earlier practitioners, its pioneers. Outside of Western countries there are opportunities to become a pioneer chiropractor yourself. Imagine putting that on your resume, as part of the legacy you add to your life?
- Also, imagine practicing chiropractic where people appreciate your work, your commitment where the love you give is the commitment and the love that comes back to you. Not like the entitlement insurance-based and disease minded healthcare where there is no patient loyalty or appreciation.

RETURN TO A VALUE-BASED PRACTICE

(no insurance hassles)

Have a knee to knee and an eye to eye experience with your patient evaluations while they are evaluating you and your new profession.

How would you rate in creating credibility, value and trust when the patient pays you cash with rates similar to the West?

Yes, you can make as good or better income, working in an exciting new culture, living on less than half of what you make.

NOT FOR THE LIGHTHEARTED

Make no mistake,

Undertaking this work is challenging but invigorating, frustrating but gratifying and being respected comes at a price... hard work. Learning some of the language.

Dealing with new worlds where so many have simpler living standards. You will become the best chiropractor of your life taking on these populations and their complex care conditions and situations.

Not a sustainable undertaking for the easy-going, the lazy or the entitled. You make it happen.

NOT FOR THE LIGHTHEARTED

But with our experience and expertise

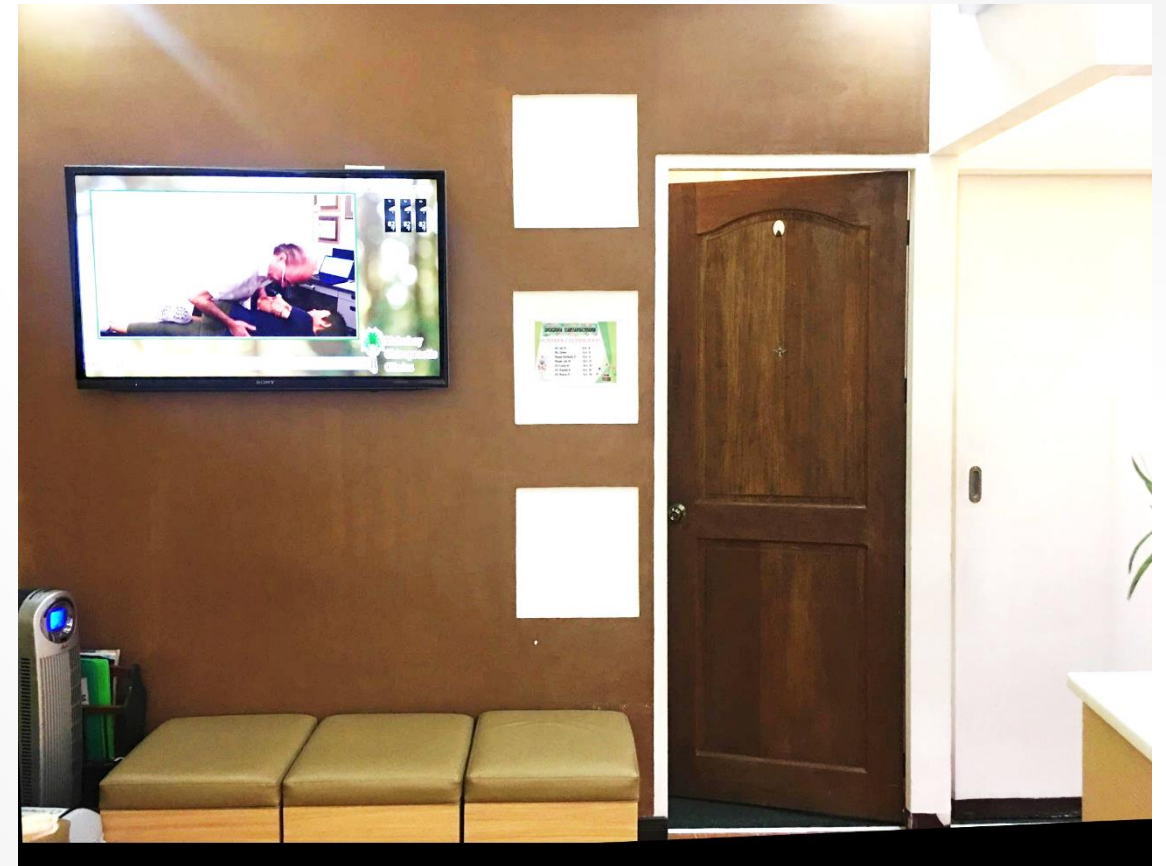

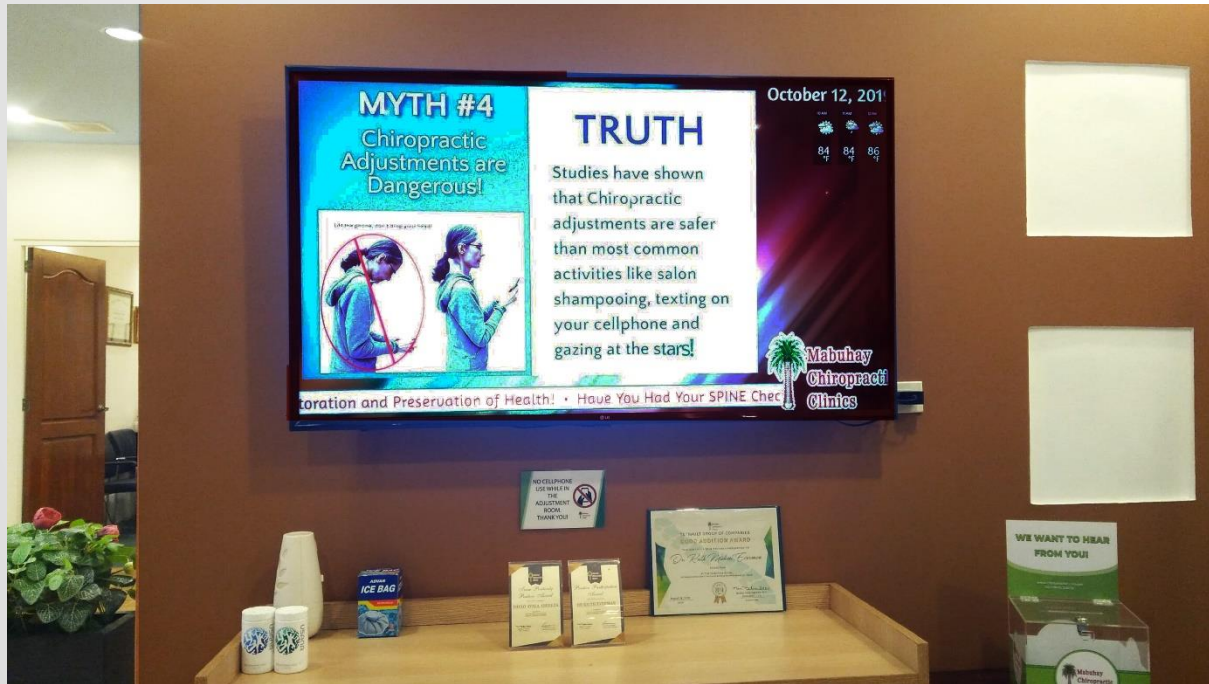

- Advancing chiropractic in these countries... you are not alone figuring things out. How to effectively market there. Dealing with their changing government requirements and know how to be a guest worker and share a life there.
- We have the cash reserves for expanding clinics, proven practice growth methods to attract and sustain a full practice. Want to see 400-500 visits per month? How about 600 to 800+? Or perhaps 300 to 400 is more your style. Proper placement can help you settle into the practice you are comfortable.
